-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2124

1. The abstract of the disclosure is objected to because phraseology language is used in this paragraph (i.e., "comprises"). See MPEP ' 608.01(b).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Guttag et al (Applicant admission Prior Art, Reference AC).

Guttag et al disclose, e.g., see Fig. 12, the invention substantially as claimed, including: a multiplier having 2 "columns" parallel partial generators. It is noted that Guttag et al do not specifically detail the claimed "first (second) summation array circuit comprising a ... **plurality of adders**"; however, the feature is old and well known in the art. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to design the claimed invention according to Guttag et al's teachings because the reference discloses a multiplier as claimed.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yano et al (Applicant admission Prior Art, Reference AE).

Yano et al disclose, e.g., see Fig. 5, the invention substantially as claimed, including: a multiplication circuit having two parallel multipliers (MA11 & MA12). It is noted that Yano et al do not specifically detail the claimed "first (second) summation

array circuit comprising a ... **plurality of adders**"; however, the feature is old and well known in the art. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to design the claimed invention according to Yano et al=s teachings because the reference discloses a multiplication circuit as claimed.

5. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bosshart (Applicant admission Prior Art, Reference AB).

Bosshart discloses, e.g., see Fig. 1, the invention substantially as claimed, including: a multiplier having adders (18, 20). It is noted that Bosshart does not specifically detail the claimed "first (second) summation array circuit comprising a ... **plurality of adders**"; however, the feature is old and well known in the art. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to design the claimed invention according to Bosshart's teachings because the reference discloses a multiplier as claimed.

6. This is a Continuation of applicant's earlier Application No. 09/477,487. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2124

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan V. Mai whose telephone number is (703) 305-9761. The examiner can normally be reached on Tue-Fri from 6:30am to 5:00pm.
